

GSA Awards First E-Authentication BPA to Operational Research Consultants, Inc.

Award Includes PKI and HSPD-12 Compliant Products and Services

Monday, January 09, 2006

Fairfax, Va. -- WidePoint Corporation's (WDPT) wholly-owned subsidiary Operational Research Consultants, Inc. (ORC), the leading provider of federal public key infrastructure (PKI) and credential managed services, announced today that it has been awarded a Blanket Purchase Agreement (BPA) with a ceiling of \$100 million by the General Services Administration (GSA). Under the BPA, ORC will provide digital certificates, credentialing services, managed PKI services and Homeland Security Presidential Directive (HSPD-12) compliant products and services.

As the first Access Certificates for Electronic Services (ACES) BPA issued under the GSA Information Technology (IT) Schedule 70 E-Authentication category (SIN 132-60), this BPA provides for authentication products and services for purposes of physical and logical access controls, electronic signature, performance of e-business transactions, and delivery of Government services.

As a GSA Shared Service Provider (SSP) with an Authority To Operate (ATO), ORC's award was based on achieving rigorous qualifications including security certification and accreditation (C&A), cross certification with the Federal Bridge Certification Authority (FBCA) and the ability to provide robust PKI services. ORC operates a government-compliant authentication-based system for electronic communications between the government and members of the general public at Assurance Levels 1 through 4. This BPA augments ORC's unique expertise as the first federal provider of Personal Identity Verification (PIV)-ready solutions.

Under the terms of the BPA, ORC's ACES certificates are intended for use by the Federal government, state and local units of government, Native American tribal units, educational institutions, and non-government entities, including the general public and commercial business entities.

Steve Komar, CEO of WidePoint, said, "This BPA will save the federal government significant time, resources and expenses in acquiring PKI and credentialing solutions as mandated under HSPD-12. ORC has almost 15 years of experience in designing, developing and implementing information assurance solutions for the federal government. This BPA award confirms the company's reputation as an elite provider of a wide range of information assurance solutions from HSPD-12 planning and integration to managed credentialing services. We look forward to delivering the means necessary for federal agencies to meet the 2006 PIV-II deadline."

About WidePoint

WidePoint is a technology-based provider of products and services to both the government sector and commercial markets. WidePoint presently specializes in providing systems engineering and information technology services as well as PKI E-Authentication and credentialing services. WidePoint's wholly owned subsidiary, Operational Research Consultants, Inc. (ORC) is at the

forefront of implementing public key infrastructure, E-Authentication and credentialing services. The company's identity management and E-Authentication services have received three major U.S. federal government certifications. WidePoint's profile of customers encompasses U.S. federal government agencies such as the Department of Defense, the Department of Homeland Security, the U.S. Treasury Department and the Department of Justice as well as major transnational corporations such as Boeing Aerospace and Northrop Grumman and several major pharmaceutical companies. ORC BPA#: BPA-FTS-06-001 (under GSA FSS # GS-35F- 0164J) is available through GSAAdvantage.gov.
