

WidePoint Company iSYS Receives Contract Modification from Department of Homeland Security

Wireless telecommunications contract modified to meet additional funding requirements by \$2.2 Million for the year

Wednesday, May 14, 2008

WASHINGTON, D.C., -- WidePoint Corporation (AMEX: WYY), a leading provider of advanced information technology, identity assurance and mobile telecom expense management services, today announced that its subsidiary iSYS has received a modification of its mobile telecom expense management systems (MTEMS) contract with the Department of Homeland Security (DHS) adding \$2.2 million to its current year value.

iSYS' MTEMS service offering provides a fully outsourced software-based solution that includes complete visibility into wireless handset assets and their usage, providing immediate and significant cost savings for its customers. iSYS estimates that it has saved DHS up to 60% on its mobile telecom-related expenses in the first year of its contract.

iSYS President Jin Kang said, "We continue to provide excellent service to DHS and are pleased the agency continues to recognize the value we bring. DHS continues to expand and transition its employees from voice-only mobile devices to higher cost voice and data devices, underscoring the need for a scalable mobile expense management system. Our MTEMS service offering is becoming the standard for mobile telecom expense management in the federal market. We are looking forward to the continued success we have experienced as we expand our services throughout the U.S. federal government through our recently awarded GSA FSSI contract award."

About WidePoint

WidePoint is a leading provider of advanced information technology products and services including identity management and information assurance services, forensic informatics and wireless technology services. WidePoint has three wholly owned subsidiaries holding major contracts, Operational Research Consultants, Inc. (ORC), and iSYS, LLC, and WidePoint Illinois.
