**WidePoint's Subsidiary iSYS Awarded Contract
by the U.S. Army Corps of Engineers**

McLean, Virginia – March 23, 2011 – WidePoint Corporation (NYSE:AMEX: WYY), a specialist in wireless mobility management and cybersecurity solutions, today announced that its wholly owned subsidiary, iSYS LLC, has been awarded a multi-year contract through the General Service Administrations (“GSA”) Federal Strategic Sourcing Initiative (“FSSI”) Contract with the United States Army Corps of Engineers (“USACE”), with an eight month base period and three option years, to provide wireless Telecom Expense Management Services (TEMS) to the USACE.

USACE contracted with iSYS to provide a full range of outsourced wireless TEMS under the GSA FSSI contract, in order to reduce costs associated with increasingly complex USACE telecommunications requirements and devices.

Jin Kang, President of iSYS stated, “The multi-million dollar award has the opportunity to expand our presence into yet another agency as we continue to demonstrate how our proprietary tools and services reduce expenses while adding capabilities from inventory and asset management to comprehensive reporting. By utilizing the GSA FSSI Wireless TEMS contract, the USACE joins a growing list of clients who are already achieving significant savings on their wireless communications costs. In this era of expense reduction and fiscal responsibility, initiatives that are proven to reduce expenses are in demand, and we are glad to do our part to help the government’s fiscal situation.”
