WidePoint Receives Three New Contract Awards and One Contract Expansion from U.S. Federal Agencies to Manage Telecommunications Assets

McLean, VA, December 1, 2014 – WidePoint Corporation (NYSE Mkt: WYY) a leading provider of Managed Mobility Services (MMS) specializing in Cybersecurity and Telecommunications Lifecycle Management (TLM) solutions, announced today that it has received three new contract awards and one contract expansion from United States Federal government agencies to manage telecommunications assets. One new award and one modification comes under the recently awarded Federal Government Blanket Purchase Agreement (BPA), with the other two, for full Telecom Lifecycle Management, coming from components of another cabinet-level agency.

The award and modification under the recently awarded Federal Agency BPA will be ramping up through the first quarter of 2015 and is a result of WidePoint’s continuing effort to actively engage other Federal Government agencies. The other two awards, one an existing client and the other a new client, reflect the value and growth WidePoint continues to generate within the federal government marketplace.

“We are pleased to see additional orders coming in under the BPA as we continue to work to communicate the value of this vehicle,” said Jin H. Kang, chief operations officer of WidePoint. “As for the other orders, it is a reflection of the confidence our current customers have for our work when they choose to renew commitments, along with the extraordinary value and service that our past performance showcases to our new federal customers.”

Steve L. Komar, chief executive officer & chairman of WidePoint Corporation, said, “We are excited to see these new orders as we build to what promises to be a strong revenue finish for our

4th quarter of 2014 that will also position us with a number of new relationships, partners, customers, awards and pilots as we enter our fiscal year 2015.”
