**WidePoint Receives New Task Order from Federal Agency for
Telecommunications Lifecycle Management**

Task Order for one base year and three option year periods valued at \$76.5 million.

McLean, VA, January 7, 2015 – WidePoint Corporation (NYSE Mkt: WYY) a leading provider of Managed Mobility Services (MMS) specializing in Cybersecurity and Telecommunications Lifecycle Management (TLM) solutions, announced today that it has received a Task Order under a previously awarded Federal Government Blanket Purchase Agreement (BPA). The Task Order, for full Telecom Lifecycle Management, is for one base year and three option year periods with a total contract value of approximately \$76.5 million. This is the 12th task order for core services awarded under this BPA over the past three quarters, spanning seven agencies and representing approximately \$291 million in total.

“The Telecom Lifecycle Management services available under this BPA help agencies reduce mobility costs, increase efficiency of their mobility programs, and ensure the productivity of their mobile workers,” said Jin H. Kang, chief operations officer of WidePoint. “We now look forward to expanding this contract further by capturing the three additional open agencies still remaining under this BPA and adding non-core mobility services to the roster of our offerings.”

Steve L. Komar, chief executive officer & chairman of WidePoint Corporation, said, “This new task order is a rewarding start to 2015, as we continue to grow our portfolio of core mobile communications services to federal markets; and take to market, with our business alliances, our new proprietary, next-generation identity management services. The opportunities that our solutions and partners provide are laying the groundwork for a very exciting and rewarding time for WidePoint.”

About WidePoint
