

WIDEPOINT MANAGED MOBILITY SERVICES

WidePoint has more than 20 years of experience serving the Federal Government. Our deep understanding of government requirements, processes, and unique needs has been proven time and again as we continue to serve military and civilian agencies and their industrial bases with innovation and efficiency.

WidePoint's Cybersecurity solutions address the unique needs of U.S. Federal agencies to ensure compliance and protect resources. We offer cloud-based services for:

- Cyber Identity to eliminate passwords and ensure that only authorized individuals and devices, code, applications, and other digital objects interact with your enterprise.
- Data Protection Services to mitigate risks related to vulnerabilities such as unauthorized access, protection of privacy information, integrity of data, and more. WidePoint ensures that the encryption, activation for decryption, and organization policies address each link in the chain, are enforceable, and offer the best risk mitigation against all potential vulnerabilities.

Our Telecommunications Lifecycle Management (TLM) help agencies manage inventory of devices and services, control expenses, and enforce policy. Our services provide customized solutions for both fixed and mobile telecom assets and services.

Our federal customers include the Department of Homeland Security (DHS) and the Transportation Security Administration (TSA), as well as the General Services Administration (GSA), The Pentagon, The Office of the Secretary of Defense, Department of the Army, U.S. Patent and Trademark Office, Centers for Disease Control and Prevention, and the U.S. Army Corps of Engineers.
