

FEDERAL SOLUTIONS

WidePoint has more than 20 years of experience serving the Federal Government. Our deep understanding of government requirements, processes, and unique needs has been proven time and again as we continue to serve military and civilian agencies and their industrial bases with innovation and efficiency.

Managed Mobility Solutions

Global, robust, integrated solutions that address all aspects of mobility management, including deployment, security, authentication and authorization, application management, and support across all smart phone and tablet options.

Telecommunications Lifecycle Management

With its user-friendly solutions, WidePoint makes it easy to manage your inventory of devices and services, control expenses, and enforce policy. Our services provide customized TEM solutions for both fixed and mobile telecom assets and services.

Cybersecurity Solutions

WidePoint's solutions enable your Public or Private Cloud to ensure that only authorized individuals, devices, code, applications, or any other digital object interact with your enterprise. Cyber identity awareness is your first line of defense in providing a level of assured security beyond a simple username and password or expensive proprietary solutions.

- Implementation

MANAGED MOBILITY SOLUTIONS

Data Protection Services

WidePoint mitigates risks related to vulnerabilities such as unauthorized access, protection of privacy information, integrity of data, and more. While most solutions advertise elegant encryption algorithms, WidePoint understands that the activation scheme employed to decrypt is as or even more important. Hackers attack the most vulnerable link in a chain of trust. WidePoint ensures that the encryption, activation for decryption, and organization policies address each link in the chain, are enforceable, and offer the best risk mitigation against all potential vulnerabilities.

System Engineering Specializing in Forensic Informatics and Information Assurance

WidePoint has expertise providing information systems in support of our nation's law enforcement and protecting critical infrastructure to ensure the fully compliant and trusted exchange and assurance of information. WidePoint teams with customers and information technology (IT) partners to provide superior services and support, offering a full lifecycle of services that include software development, system integration, testing, security engineering, training, certification and accreditation, and operations and maintenance services. Our solutions are interoperable with legacy systems and integrate seamlessly with all leading software applications on the market today.

IT Outsourcing

From Architecture and Planning to Software Implementation, WidePoint believes that the success of any client engagement is predicated on the experience, expertise, and knowledge of the consultants we provide. WidePoint continually enhances our offerings by encouraging and supporting the ongoing education of all of our employees to maintain their—and WidePoint's—leading edge.

ABOUT WIDEPOINT CORPORATION

WidePoint has more than 20 years experience serving U.S. Federal Government agencies including the Department of Homeland Security (DHS) and the Transportation Services Administration (TSA), as well as the General Services Administration (GSA), The Pentagon, The Office of the Secretary of Defense, Department of the Army, US Patent and Trademark Office, Centers for Disease Control and Prevention, and the U.S. Army Corps of Engineers.

WidePoint's expertise with government solutions is deepened by subsidiaries Operational Research Consultants Inc. and iSYS LLC, now part of WidePoint Corporation, both have long-time experience with federal and state/local government.

A trusted partner to the federal government, ORC has more than 20 years delivering information security solutions to both government and enterprise customers, ensuring the fully compliant and trusted exchange and assurance of information.

iSYS, LLC delivers innovative solutions in Telecom Expense Management services and IT consulting to government and commercial clients. iSYS has been providing advanced IT solutions to a broad range of U.S. Federal Government agencies since 1999. Our extensive experience in lifecycle support of telecommunications and IT management services puts iSYS in a select group of government contractors.
