

TELECOMMUNICATIONS LIFECYCLE MANAGEMENT

Financial & Operational Control of Your Telecommunications Expenses

The background of the top section features a close-up of a smartphone and a document. The document has a large dollar amount "\$447.53" printed on it. The text on the document is partially obscured but includes phrases like "Using Direct Debit. We will d" and "on 15 Jun".

WidePoint's Telecom Lifecycle Management provides a complete and secure solution for both mobile and landline management, customized to enforce your policies, ensure contract compliance and provide visibility for all telecom assets and services while maximizing your telecommunications budget.

THE CHALLENGE

- Controlling and managing telecom spend and inventory
- Managing a global, mobile workforce
- Addressing the increased demand for BYOD
- Gaining global visibility of telecom spend to increase efficiencies

- Get better contract terms and pricing
- Eliminate billing errors and late fees
- Eliminate expenses related to incorrect inventory

THE SOLUTION

Telecommunications Expense Management (TEM)

- Invoice-to-contract auditing and processing to eliminate billing errors found on most telecom carriers' invoices
- Contract management and optimization to ensure the best contract terms and pricing
- Inventory Management and maintenance of all wired, wireless, and data assets to eliminate all of the expense associated with incorrect invoices based on incorrect inventory

Mobile Device Management

- Centralized management and control of all mobile assets
- Optimize spend on mobile devices

WidePoint Experience

With over 20 years of experience and a staff of more than 200 telecommunications experts, WidePoint has the requisite skills and expertise to provide the transparency and control of this complex and dynamic aspect of the enterprise operations.

Our cloud-based Management Portal can provide secure, convenient, centralized management of your entire telecom landscape, including order management, real-time inventory management, data integration, help desk support, and robust reporting on usage, costs, and more
