**WidePoint Unifies iSYS and ORC Subsidiaries  
Under the WidePoint Brand**

*iSYS LLC and Operational Research Consultants Inc. adopt WidePoint brand to reflect an integrated market strategy combining unique, complementary solutions*

McLean, VA, February 29, 2016 – WidePoint Corporation (NYSE Mkt: WYY), a leading provider of Managed Mobility Services (MMS) specializing in Cybersecurity and Telecommunications Lifecycle Management (TLM) solutions, announced today that it has changed the names of two of its primary subsidiaries in an initiative to market the unique, complementary product sets from each under a common WidePoint family of solutions.

The new legal entities, WidePoint Integrated Solutions Corp. (formerly iSYS LLC) and WidePoint Cybersecurity Solutions Corporation (formerly Operational Research Consultants Inc., or ORC), will offer their solutions to the marketplace going forward as WidePoint, and each will adopt the WidePoint corporate logo and branding.

During the past several years WidePoint has been working to build and deliver market-leading solutions to enterprises and government entities dealing with converging issues surrounding both mobility and security. The ability to provide solutions to manage and secure identities for people and mobile devices has been a key focus of the Company during this period. Consolidating under the WidePoint brand is a natural evolution of these efforts and an exciting step forward for the Company.

WidePoint will now be able to offer customers and strategic partners a wide range of integrated solutions under a single brand, thus enabling the Company to expand its visibility in all of its target markets. Another expected benefit of the unified branding will be a broader and expanded

perception of WidePoint's unique expertise and solution sets in identity and telecommunications/mobility management.

Steve L. Komar, Chief Executive Officer & Chairman of WidePoint Corporation, said, "This is an exciting milestone for the company. We look forward to continuing to provide efficient and secure solutions for our existing customers and partners, while we expand our presence in the commercial and government sectors. These markets have experienced multi-year growth, yet remain underpenetrated, and we believe WidePoint is now well-positioned with the right offerings to meet their needs."

WidePoint's new common-branded services provide global, robust, integrated, and bundled solutions to address all aspects of mobility deployment, management, and support across all device types through one single brand.

Solutions include WidePoint [Certificate-on-Device™ digital identity and managed validation services](#), which provides higher assurance security for mobile devices, and its [ITMS™ Telecom Lifecycle Management System](#), a carrier-independent, cradle-to-grave proprietary lifecycle management solution.

### **About WidePoint**
