**WidePoint Invited to Participate in Panel Discussion at
Samsung Developer Conference**

*Certificate-on-Device™ will be among the topics discussed in “How Samsung Mobile
Platforms Support Digital Credentials”*

McLean, VA, April 26, 2015 – WidePoint Corporation (NYSE Mkt: WYY) a leading provider of Managed Mobility Services (MMS) specializing in Cybersecurity and Telecommunications Lifecycle Management (TLM) solutions, announces its participation in a session titled *How Samsung Mobile Platforms Support Digital Credentials*, at the Samsung Developer Conference being held April 27-28 in San Francisco.

The panel on which WidePoint will participate will provide developers with information about how digital certificates are being engineered into Samsung mobile platforms, and how they can leverage WidePoint Certificate-on-Device and Samsung capabilities to deliver credential-enabled applications and processes.

With the partnership announced in June 2015, WidePoint Certificate-on-Device has been integrated with Samsung SDS EMM solution to enable customers to deliver WidePoint digital certificates to Samsung devices that use Samsung KNOX.

The Samsung Developer Conference features sessions and workshops geared for developers and other innovators, with 2016 topics that include the Internet of Things, enterprise, mobile, wearables, and more.

The conference takes place April 27-28, 2016, in San Francisco, CA, at Moscone West. Learn more and register online at www.samsungdevelopers.com/sdc2016.
