WidePoint Corporation Featured by LD Micro

McLean, VA – May 20, 2018 – WidePoint Corporation (NYSE American: WYY), provider of Trusted Mobility Management (TM2) specializing in Telecommunications Lifecycle Management (TLM), Identity Management, and Bill Presentment & Analytics (BP&A) solutions, was honored to be featured by Chris Lahiji, President, in LD Micro index’s weekly newsletter:

WidePoint ([WYY](#), part of LDMi index) is touching ground on Tuesday. In the past year, the Company has restructured its management, cut costs, and was primarily focused on the government sector for most of its history. Today, it is focusing on enterprise as everything in the world has gone mobile. Securing mobile communication (phones, tablets, laptops) will be one of the largest themes in the coming years. Just ask of its importance at Equifax, which basically destroyed the lives of nearly 150 million Americans. This was the worst breach in history. I am not surprised that it did not get the media attention and scrutiny it deserved. A wise man once told me on Fox News over a decade ago in the green room. "The only way to know if something is important, is when the media decides NOT to cover it."

For full disclosure, my family (Chris Lahiji) owns shares in **WidePoint (WYY)**.

Mr. Jin Kang, President and Chief Executive Officer of WidePoint Corporation, stated, “Very exciting that Chris Lahiji sees our vision and the expanding opportunity of securing and managing the mobile landscape. Thanks to Chris and the LD Micro index for their interest in WidePoint.”
